

EQUINE PERFORMANCE OPTIMIZATION

Your horse's hair scan will precisely map over 800 indicators in his/her system, not only measuring vitamin and mineral inadequacies, but also including issues with parasites, acids, viral and environmental factors just to name a few.

The hair scan proceeds to run through a super computer and within minutes generates a highly detailed, comprehensive, 26-page report, specifically for your horse.

Based on the report, Pinpoint Doctors and Pharmacists formulate a customized supplement regimen so your beloved athlete can achieve EQUINE PERFORMANCE OPTIMIZATION.

PHARMACEUTICAL GRADE SUPPLEMENTS

Did you know there are different grades of supplements?

Animal supplements are the lowest grade available and often contain unwelcome additives. UNTIL NOW!

Pinpoint Equine believes your horse deserves the very best in order to reach his/her full potential.

Not only are our supplements custom formulated to meet the precise needs of the individual horse, but they are of the highest quality grade of supplements to be found, PHARMACEUTICAL GRADE.

STABLE/HERD TRENDS

TRENDS in imbalances for you entire stable full or herd of horses are often established through dietary and environmental factors.

Occasionally, persistent health issues arise, regardless of other sometimes numerous treatments.

The hair scan can reveal these 'patterns' throughout a group of horses, then identify from where the issues stem and recommend subsequent dietary modifications and proper supplement regimens to fully support each horse's needs and ensure the health and well-being of the herd.
